RD 2 for 3 Series and Z3.

Size	Offset	Part No.
17" Standard Setup		
17 x 8.0	32	124 12 70 803
18" Standard Setup		
18 x 8.0	32	124 12 80 803
19" Standard Setup		
19 x 8.5	38	124 12 90 853

RD 2 for 5, 6, 7 and 8 Series.

Size	Offset	Part No.
18" Staggered Setup		
18 x 8.5	15	124 12 80 851
18 x 9.5	18	124 12 80 951
19" Staggered Setup		
19 x 8.5	15	124 12 90 851
19 x 9.5	18	124 12 90 951

The RD 2 Wheel Program - An Overview

The Racing Dynamics five spoke design was originally introduced in 1987 with the Hollow Spoke Magnesium wheel.

Its elegant lines single-handedly created the market for five spoke wheels on BMWs, as well as making it an instant classic amongst wheel designs.

In June 2000 we decided to redesign our wheel program to better fit current BMW models and their technical characteristics.

Our engineers were given free reign, providing they could meet four specific requirements:

- Maintain the "family feel" that makes Racing Dynamics wheels so exclusive.
- Reduce weight to the minimum by using Finite Element Analysis software
- Engineer staggered fitments that offer the best performance without comprising ride quality, nor require modifications to the car.
- Maximize the outer lip size.

The result of these efforts is the new RD 2, which represents the most radical evolution to date of the original Racing Dynamics design.

The RD 2 program starts with a 17", and is offered in a comprehensive choice of BMW fitments.

The RD 2 also features the mounting points for the original BMW wheel alignment machine.
